The most popular features in AutoCAD are undoubtedly the many geometric drawing tools, which include standard 2D and 3D tools and specialized tools for architectural, surveying, mechanical, electrical, plumbing, and many other trades. Also useful are several specialized drawing tools, which enable users to save time and effort by reducing the number of steps required to draw the same type of object. According to the most recent version of the annual CADTrends® software survey, released earlier this month, AutoCAD software is the fourth most popular desktop CAD program in the world (following Solidworks, AutoCAD LT and Alias Magic). The full survey results are available at: Autodesk helps users make money from AutoCAD drawings and vice versa. Autodesk also offers a range of after-sales services to its AutoCAD users. The most popular of these are Autodesk's subscription-based AutoCAD 360 cloud, Autodesk's cloud-based cloud drawing service, AutoCAD Cloud, and Autodesk's cloud-based cloud computing service, AutoCAD Online. AutoCAD 360 is the most popular of these, with 17.4 million installations, whereas AutoCAD Cloud is a close second with 16.5 million. All of these services are free to users of AutoCAD and AutoCAD LT. More than 75% of companies using AutoCAD and AutoCAD LT have at least one AutoCAD 360 customer and/or plan to add one in the near future, according to the latest Autodesk survey, which was released in May 2015. Autodesk's AutoCAD360 cloud is available to both existing and new AutoCAD and AutoCAD LT users. Those who pay for AutoCAD360 are entitled to use AutoCAD and AutoCAD LT on any device they choose. Those who do not pay for AutoCAD360 can use AutoCAD and AutoCAD LT on only a single device (PC or Mac). New users and all existing users who are not AutoCAD360 subscribers are entitled to use Autodesk's AutoCAD cloud service for free. Autodesk's cloud-based cloud drawing service, AutoCAD Cloud, enables users to share 2D and 3D drawings and get their
