Open Autocad, select a template, and print the preview. Remove the plastic sheet from the print out, and cut the contours. Unzip the zip file, and place the *.hxf file in the folder. Close Autocad and go to "Autocad" -> "Preview". You can use the Autocad Viewer to test your model. How to use the code The contours for the plastic sheet are placed at the path in the model, which can be found from the "Settings" window. If you are using the default installation, the settings are located in the folder "Software\Autodesk\Academy\AutoCAD" How to cut the contours by paper cutter or guillotine To cut the plastic sheet, it is better to use a guillotine or paper cutter. Connect a paper cutter or a guillotine to the selected path in the model. The tool automatically cuts all the contours in the model. Change the side of the guillotine.
